DASHBOARD OVERVIEW

Total Views	Total Hours
9 995	1 522,3

Channels	Top Channel
17	Live Events

Avg Duration (min)	Unique Viewers
9,1	4 386

Total viewing hours indicate strong engagement.

A small number of channels contribute the majority of watch time.

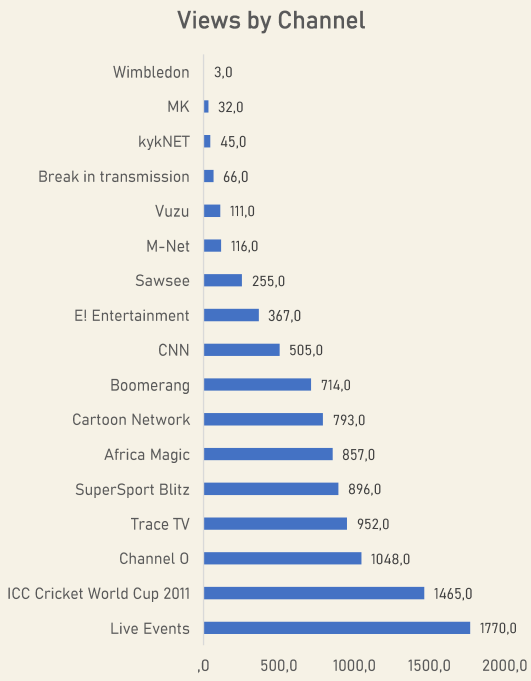

The platform demonstrates consistent customer engagement.

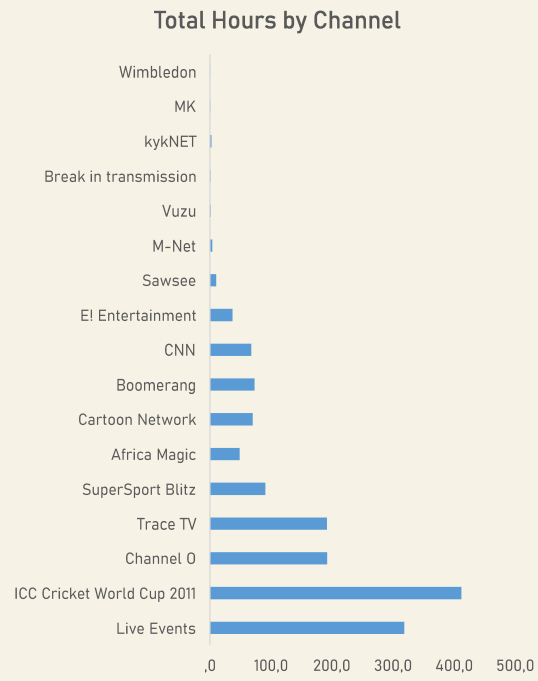

A few channels contribute the majority of total watch time.

Monthly viewing patterns reveal opportunities for targeted marketing campaigns.

Average viewing duration suggests strong viewer retention.

CHANNEL PERFORMANCE

Insights

Live events has more viewership, however, viewers spent more time watching cricket.

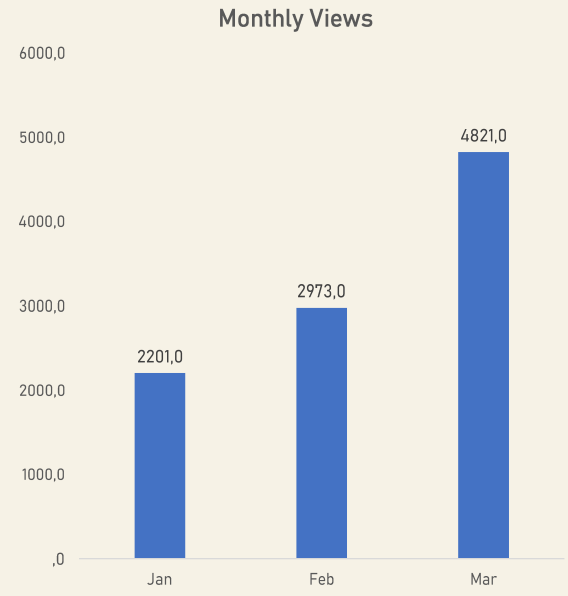

Wimbledon has the lowest viewership and less hours spent on it.

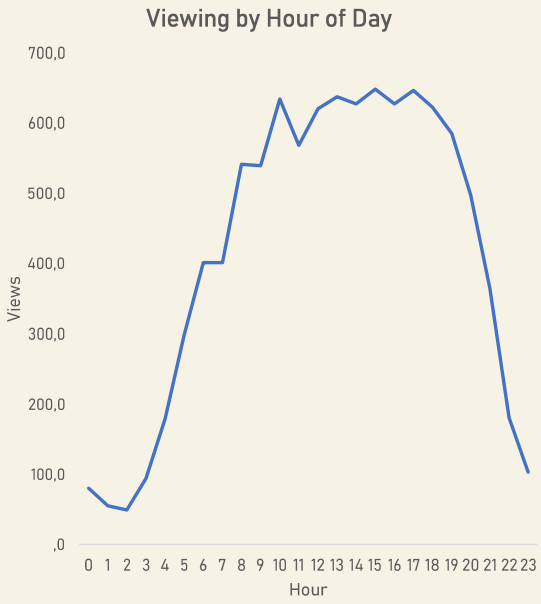

Recommendation

Invest more in Live Events to attract even more viewers.

Introduce better attractive shows onto the likes if MK, VUZU and KykNET to attract views.

VIEWERSHIP BEHAVIOUR

Insights

Monthly viewership trends reveal clear opportunities for proactive content scheduling and targeted marketing.

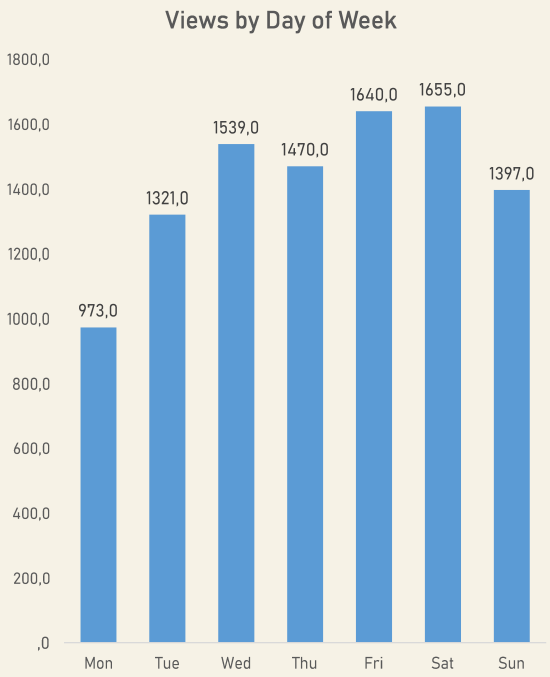

More viewership during the mid day and afternoon must be a high priority due to high viewership.

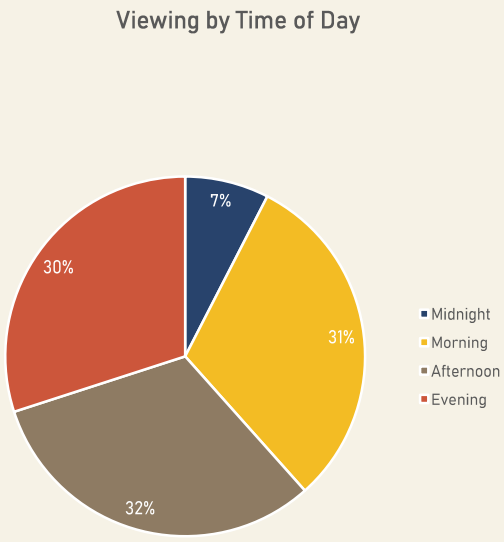

Recommendation

Invest in shows during the day to attract more viewers.

Schedule premium content releases during months that historically experience lower viewership to maintain consistent audience engagement.

VIEWERSHIP BEHAVIOUR

Insights

Saturday has the highest viewership because it is off day from work.

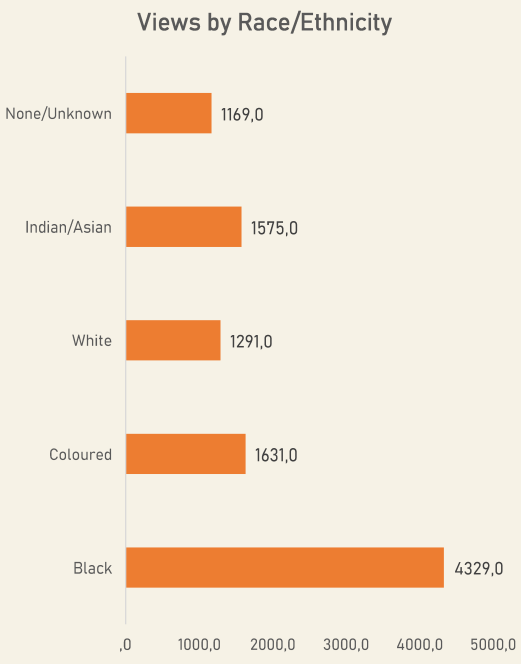

The afternoon has the highest viewership and so is the morning.

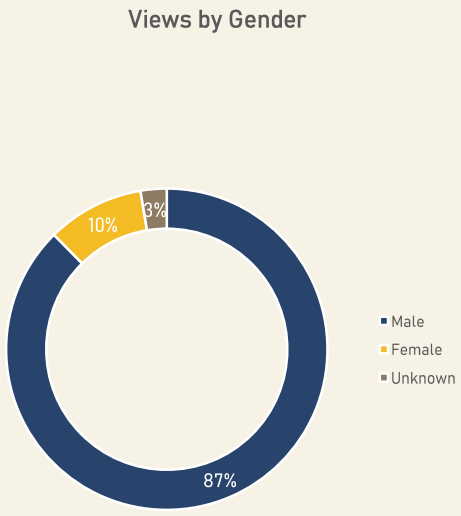

Recommendation

Invest more in the afternoon shows and make them more interesting to attract even more viewers.

Improve Monday content due to its lowest viewership.

AUDIENCE SEGMENT

Insights

Black people watch more TV than any other race.

Understanding gender preferences helps optimize content acquisition and promotional campaigns.

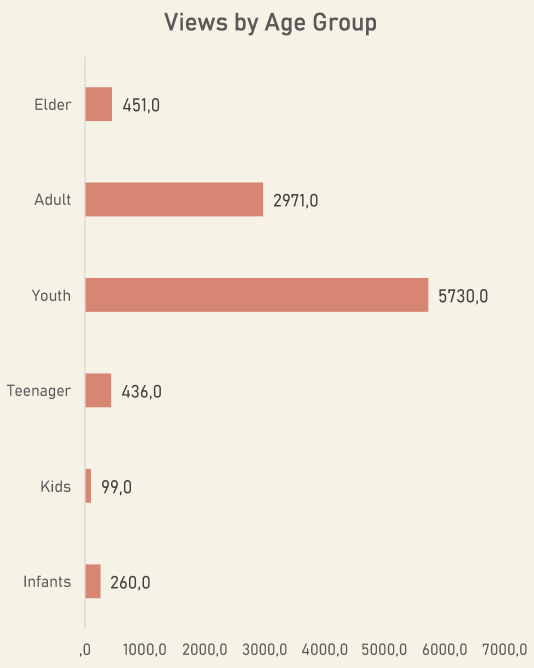

Males watch more TV than females which is more worrying given that females in general watch more tv than males.

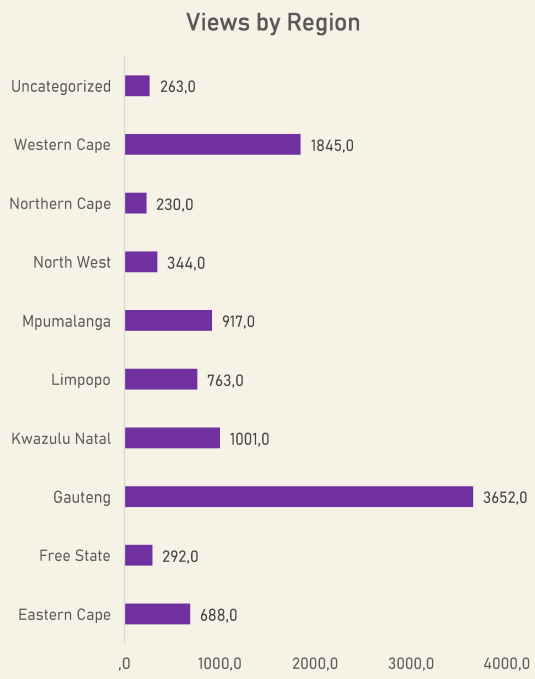

Recommendation

Keep investing in shows that males love to watch especially Live events and Cricket.

Improve the quality of the shows to improve viewership amongst other races.

AUDIENCE SEGMENT

Insights

Certain regions consistently generate higher viewing hours and viewing records than others.

Younger viewers tend to consume more content and spend longer periods on the platform.

Middle-aged viewers generally show consistent engagement across a broader range of channels.

Recommendation

Increase advertising and promotional campaigns in underperforming regions.

Introduce tailored content recommendations based on viewer age and viewing history.

Continue investing in content preferred by the most active age groups like Youth.

INSIGHTS AND RECOMMENDATION

Insights

Total viewing hours and viewing records provide an indication of overall platform engagement.

Monthly viewership trends highlight periods of high and low customer activity, revealing seasonal viewing patterns.

Average watch duration reflects viewer engagement and content quality.

Underperforming channels may require content refreshes, marketing support, or scheduling improvements.

Viewership peaks during specific hours of the day, indicating the best times to release or promote content.

Certain regions and age groups contribute a disproportionately large share of total viewing.

Gender and customer profile analysis helps identify the most engaged audience segments.

Recommendations

Increase viewer engagement and average watch duration.

Improve customer retention through personalized content recommendations.

Grow subscriptions by targeting high-potential audience segments.

Optimize marketing spend using data-driven insights.

Increase revenue through improved content performance and audience growth.

Support executive decision-making with real-time performance monitoring.
